WELCOME TO AHMEDABAD

We are very delighted to invite you all to AHMEDABAD, GUJARAT for LARYNGOLOGY SUMMIT 2016. The TECHNOLOGY has created a sea change in LARYNGOLOGY as into the other fields of medical science in last decade or so. Taking the theme of TECHNOLOGY IN LARYNGOLOGY, we will try to cover different and new modalities of treatment pertaining to various of voice, airway & swallowing disorders.

This intensive program will constitute of many elaborative lectures, surgical video sessions, hands on workshops and live surgery demonstrations. Please, make yourself very hungry to take advantage of amazing academic feast spreaded over 3 days and the servings will be by stalwarts of laryngology from around the world.

Ahmedabad, Founded by Sultan Ahmad Shah in 1411 AD, in the state of Gujarat, has grown into one of the most important modern cities of India. Straddling the Sabarmati river, this prosperous city of six million is a delight for archeologists, anthropologists, architects, historians, sociologists, traders, bargain hunters and plain tourists.

An exciting combination of traditions and modernism, Ahmedabad captures all visitors with its diversity of places, religious and ethnic communities. It is interesting to see how Indian atmosphere mix with the colonial British influence, how Hinduism, the world's oldest existing religion develops in the globalising world.

Ahmedabad is proud to have Sabarmati Ashram (also known as Gandhi Ashram), located on the banks of the River Sabarmati. This was one of the residences of Mahatma Gandhi, who lived there for about twelve years along with his wife, Kasturba Gandhi. It was from his base here that Gandhi led the Dandi march also known as the Salt Satyagraha on 12 March 1930. In recognition of the significant influence that this march had on the Indian independence movement, the Indian government has established the ashram as a national monument

The Gujarat is known for roar of Asiatic Lions, the sole home of the Asiatic lion (*Panthera leo persica*) in the wilderness. SANSAR-GIR is a forest and wildlife sanctuary in Gujarat, established in 1965 with a total area of 1,412 km². It is considered to be one of the most important protected areas in Asia due to its supported species. The ecosystem of Gir, with its diverse flora and fauna, is protected as a result of the efforts of the government forest department, wildlife activists and NGOs.

And when it's about enjoyment and entertainment, no festival can beat NAVRATRI. Navratri, meaning 'nine nights', is one of the most popular and widely celebrated Hindu festivals in many parts of India. Gujarat, however, is the only state that erupts into a nine-night dance festival, perhaps the longest in the world.

Symbolizing victory of positivity over negativity, Navratri literally means 'nine nights' in Sanskrit; Nav - Nine and Ratri - nights. During these nine nights and ten days, the three forms of the goddess -Durga, Lakshmi and Saraswathi - are invoked. The dance form known as ras garba (also joined sometimes by dandiya, which uses small wooden sticks & played in large group).
